Tutorial: Parallel Performance Analysis and Score-P Basics

Tuesday, 5 November 2024 13:30 (2 hours)

In this first session, we will introduce the key concepts of parallel performance analysis using Score-P. After introducing some basic terminology and the tools ecosystem centered around the Score-P instrumentation and measurement system, the general workflow of using Score-P to collect and the Cube graphical user interface to examine application profiles will be explained via hands-on exercises with a smaller-sized benchmark code.
